**Please see below for sample collection and shipping instructions**

**SHIPPING INFORMATION:**

- **CSF (3mL):** Send in small sterile tube and/or polystyrene tube.
- **Serum (1mL):** Draw blood in red top tube (Gold Top-SST Tube) centrifuge and send ONLY serum (no red blood cells) in small sterile tube. Note: ACD plasma can be tested although serum is preferred.
- Samples may be frozen until shipment. Please send with ice packs (DRY ICE is NOT necessary). Please make sure that the caps of tubes are tightly closed; we highly recommend that they are secured with Parafilm to prevent leaks.
- **Please ensure your samples are scheduled to arrive before 3pm on Friday of any desired workweek. Please do not send samples on weekends or holidays as Mitogen will be closed and SAMPLES WILL NOT BE RECEIVED UNTIL THE FOLLOWING WORKWEEK.**
- Shipments from any shipping company are accepted (including Purolator and FedEx).
- Tracking numbers should be retained for delivery confirmation.
- If problems arise or your package is not delivered promptly please email [lab@mitogendx.com](mailto:lab@mitogendx.com)

**SEND TO:**

Mitogen Advanced Diagnostics  
Laboratory  
University of Calgary  
HRIC 3A26, 3330 Hospital Drive NW  
Calgary, AB, T2N 4N1

**RECEIVING YOUR RESULTS:**

- Results typically follow 7-10 days after receipt of sample, depending on the test(s) requested. Please visit our website for turnaround times for specific tests ([www.mitogendx.com](http://www.mitogendx.com)).
- **Outside Alberta** – Results will be faxed to referring laboratories only. If you have not received your results, please contact the laboratory that sent your sample. For missing or delayed reports, please contact us.
